For the purposes of this TMD and any Product Disclosure Statement date references contained below, these refer to the issue date of the underlying PDS which relates to the product (i.e., 10 August 2009 and 28 April 2010 in the example above).

Distribution conditions

Distribution conditions: Personal advice	<p>Distribution conditions do not apply with respect to the provision of personal advice or to arranging for a consumer to apply for or acquire the product for the purpose of implementing personal advice. This is because regulated persons who provide personal advice have statutory and general law duties with respect to the provision of personal advice which apply instead of the distribution conditions.</p>
Distribution conditions: General advice	<p>The following distribution conditions apply with respect to the provision of general advice:</p> <ul style="list-style-type: none"> • Distributors must be authorised by TAL Life to distribute the product; • Distributors must obtain information required to determine whether the consumer is eligible for the product and must not permit a consumer to be issued the product if the consumer does not meet the eligibility criteria (provided that the consumer has provided all relevant information honestly and completely); • Distributors must draw the consumer’s attention to the key features of the product, including an estimate of the applicable premium (based on the consumer’s requested product benefits) to enable the consumer to determine if the product is likely to be consistent with their objectives, financial situation and needs; • Distributors must have in place processes in relation to call scripts, training, monitoring and quality assurance designed to ensure the appropriate distribution of the product (call centres only); and • Distributors must make the Product Disclosure Statement of the product available to consumers.
Referrers	<p>Referrers are distributors who may engage in retail product distribution conduct (such as general advice on a website) but have limited or no contact with the consumer. In these circumstances, the referrers may refer the consumer to TAL Life or another distributor who must comply with the distribution conditions as outlined above.</p>

Appropriateness of the distribution conditions: General advice

The distribution conditions, will result in the product being issued to consumers who are likely to be in the target market because:

- The requirement for distributors to determine whether a consumer is eligible for the product and not permit consumers to be issued the product if they do not satisfy the eligibility criteria means the product cannot be issued to consumers who are not eligible for the product; and
- The requirement for distributors to draw the consumer's attention to the key features of the product including an estimate of the applicable premium based on the consumer's requested product benefits, is likely to prompt a consumer to either proceed or not to proceed with an application based on their financial capacity to afford the applicable premiums and determination of whether the product is consistent with their likely objectives, financial situation and needs.
